

Godt samarbeid for god mobilitet

Kollektivkonferansen 2019

A long-exposure photograph of a city street at night. The image is heavily blurred, showing streaks of light from street lamps and buildings. In the foreground, a person in a red jacket and dark backpack is walking away from the camera. To their left, another person is partially visible. The street is paved with cobblestones. In the background, there are more buildings and a bright, glowing light source, possibly a large screen or a very bright light. The overall atmosphere is one of a busy, developing urban environment.

KREVENDE ENDRING

GODT SAMARBEID

The background is a dark blue gradient. It features a complex network of glowing light blue lines that resemble circuit traces or data paths. These lines are interconnected by small, bright blue dots or nodes. In the center of the image, there is a more dense and brighter cluster of these light points, creating a focal point of energy or data. The overall aesthetic is high-tech and futuristic.
