### Climate friendly solutions

"The operators plan for how to contribute to increased use of public transportation and reduced car traffic. Additionally, how the operator can help relieve pressure on public transport during unforeseen and planned disruptions."

### Climate friendly solutions

#### 1. Coverage throughout Oslo

- Describe the operating area
- Describe how the provider will ensure a good offer in its operating area

#### 2. Routines for how to support public transport

- Describe areas where operations will be piloted and criteria for further operation after the test period.
- Describe how to build habits that support the connection between public transport and micromobility

### 3. Contribution in the event of planned or unforeseen deviations in public transport

# Data

#### § 11. Sharing of data

Operators must share real-time and historical data about all their vehicles with the municipality and Ruter AS.
